## RESEARCH EXPERIENCE

2022 JULY – 2025 JUNE

### Functional Ecology Lab, Hacettepe University Undergraduate Internship

Engaged in ecological investigations within steppe and Mediterranean ecosystems, conducting field-based soil and plant sampling alongside laboratory processing of ecological specimens. Organized, cleaned, and analyzed preliminary datasets, applying ecological and statistical methods to extract meaningful patterns. Contributed to the preparation of research materials, supporting the development and refinement of ongoing ecological research.

ADVISOR: PROF. ÇAĞATAY TAVŞANOĞLU

2025 FEBRUARY – MARCH

### Evolutionary Genetics Lab, Ankara University Undergraduate Researcher

Performed DNA extractions, PCR amplifications, and library preparation for an Edna metabarcoding investigation of post-wildfire soil microbial communities. Processed soil samples and executed laboratory workflows for high-throughput sequencing. Organized the dataset and independently analyzed bacterial and fungal community responses across gradients of wildfire severity.

HOST: PROF. EMRE KESKİN

2024 JULY – SEPTEMBER

### Eisenhauer Lab, German Centre for Integrative Biodiversity Research (iDiv) Erasmus+ Traineeship Programme Internship

Contributed to long-term ecological experiments (DroughtNet) evaluating the effects of drought and mineral fertilization on soil bacterial and fungal communities. Conducted soil sampling, PLFA-based laboratory analyses, and soil processing for microbial community characterization. Organized and analyzed experimental datasets and contributed to scientific writing within the Experimental Interaction Ecology group.

ADVISORS: DR. MARIE SÜNNEMANN, PROF. NICO EISENHAUER

2023 APRIL – NOVEMBER

### TUBITAK (Scientific and Technological Research Council of Türkiye) Research Assistant (TUBITAK 1002-A Scholarship Holder)

Project: The Impact of Post-Fire Restoration Practices on Plant Communities in Turkish Pine (*Pinus brutia*) Forests of Muğla, Marmaris, Türkiye

Contributed to fieldwork and data collection assessing post-fire restoration impacts on *Pinus brutia* forest communities. Assisted with vegetation sampling, ecological assessments, dataset preparation, and the analysis of plant community responses to restoration practices.

ADVISORS: PROF. ÇAĞATAY TAVŞANOĞLU, GÖKHAN ERGAN
